

# Diam Jag

JAGUAR CD

Diam Jag

Playing Diamjag is a breeze - choose the direction of your sphere, watch it roll until it hits an obstacle, repeat to collect every diamond on the board. Seems simplistic ? You will soon discover that solving the 28 mind-boggling levels is sometimes trickier than it looks !

But completing the game is only the beginning. At the end of each level, you are given a code to keep track of how fast you were. By entering this code on the Diamjag website, you can compete against players from all over the world for the first place !

By the way, some people claim that entering an arcane combination on the title screen reveals a surprise... will you discover the truth ?
